

Robert F. Wescott, Ph.D.

Robert F. Wescott is President of Keybridge Research LLC, an economic and financial research firm in Washington, DC, that serves G-7 governments and major financial institutions and companies. Dr. Wescott concentrates on global economic and financial analysis and serves on global asset allocation committees of well-known international financial firms. From 1999 until 2001, Wescott served as Special Assistant to the President for International Economic Policy at the White House. As senior international economic adviser to President Clinton, he helped develop Administration policies toward G-7 countries, Russia, China, India, other key emerging-market economies, and the international financial system. During 1993-94, Wescott was Chief Economist at the Council of Economic Advisers, where he developed the Administration's U.S. macroeconomic forecasts and performed policy analysis.

From 1994 to 1999, Wescott was Deputy Division Chief at the International Monetary Fund. In the IMF's Research Department he helped produce the *World Economic Outlook*, the Fund's semi-annual review of world economic prospects, key risks, and policy challenges. In the European Department he was responsible for Eastern European countries in transition. He participated in IMF missions to Japan, China, Poland, and most of the countries in Western Europe. Between 1982 and 1993 Wescott was Senior Vice President and Chief Economist at WEFA Group (Wharton Econometric Forecasting Associates—now Global Insight), the Philadelphia-based economic forecasting and consulting firm, where he oversaw all forecasting, economic modeling, consulting, and research activities for the U.S. Group. He also managed the firm's Global Economic Outlook Committee and coordinated the firm's international forecasting from centers in Philadelphia, Washington, Toronto, London, Rome, Frankfurt, and Tokyo. In 1989-90, Wescott lived in Japan, where he helped the University of Pennsylvania establish the International Center for the Study of East Asia Development (ICSEAD) in Kitakyushu, which does quantitative economic modeling and research on East Asia.

Dr. Wescott has published research papers in the areas of fiscal policy, global saving patterns and interest rates, exchange rate determinants, money and banking, the credit crunch in Japan, energy policy, inflation targeting, and economic development, especially issues related to globalization. Wescott holds a Ph.D. in Economics from the University of Pennsylvania, 1983.
